The technical drawing illustrates a mechanical assembly, likely a pump or motor unit, mounted on a base plate. Key dimensions are indicated: height 693, width 284, and a central vertical dimension of 185. A large circular component, possibly a flywheel or pulley, has a diameter of 360 min. Two shafts extend from the bottom, each with a diameter of 600 min. On the left shaft, there is a flange with a thickness of 120. The right shaft features a stepped bearing housing. Arrows indicate clockwise rotation for both shafts.
